28th August 2025, 1pm**

Terry's top T-bone

Temana Charolais studmaster Terry Griffin, Bordertown, is no stranger to producing

Charolais lift profits on Alice desert block

WHEN Alice Springs cattleman Francis (Shady) Smith signed for Charolais bulls to put more weight into his predominantly Angus herd, it was a big risk for one breed.

After all, it's not exactly prime cattle country where the average rainfall hovers at about 125mm (that's just in years at all) — and what the desert view of the breeding means that calves even just take their chances without supervision.

But despite this disadvantage, Charolais bulls have come through an efficient weight factory, putting on extra 50kg no matter by the time they are 12 to 14 months.

Mr Smith, with his wife Kaye, has Mattie, and she keeps her herd from the 1770s and 1800s.

Smith's Charolais are not just a breed, they are a way of life. They are a breed that is not just a breed, they are a way of life. They are a breed that is not just a breed, they are a way of life.

These NE-cross Charolais cross steers reinforce the value of using Charolais bulls as terminal sires.

Several sources including the Watkinson family and John Hagley's Bullock Steak, Bulahna, further back, came from Terry Griffin's Temana stud, Bordertown, SA.

Smith's Charolais are not just a breed, they are a way of life. They are a breed that is not just a breed, they are a way of life. They are a breed that is not just a breed, they are a way of life.

Royal Show

Charolais breeders had every right to be feeling on top of the world after their thoroughly convincing wins at this year's Royal Adelaide Show.

Earlier in the show a Charolais steer bred by Hamish Gosse, Kadlunga, Mintaro, and produced for judging by the Overton High School, won the grand champion led steer on the hook. And later in the week, the Charolais grand champion bull and female went on to be supreme interbreed beef pair.

Our photo, taken at Montefiore overlooking Adelaide, shows Daryl Giddings (left) of Sedalia Charolais stud,

the top prize winner, with the grand champion bull. They were the recipients of the trophy for our

- Junior champion cow or heifer: Temana Lady, Temana Charolais Stud

exhibitor husband and wife team, Toowoomba, who won their class well with a year although they did not exhibit the senior champion bull.

But this year, 16-month-old Temana Wilbur did them proud.

The bull was named supreme exhibit and senior

judge Jonno Spence, Victor Harbor, said the Temana cattle shone out. "I thought the quality of the cattle was very good," he said.

"The junior heifer was an excellent combination of carcass and refinement - a strong spined, stylish female."

"The senior cow was a female, a great specimen of length, strength, and capacity."

Mrs Griffin said it was a very good show with a solid line-up.

Temana Xorox was junior champion bull; Temana Meillard, reserve; Temana

Temana top on hook

heavyweight Charolais steer on Terry and Maylene Griffin's Temana Charolais stud, Bordertown, the champion heavyweight and champion steer carcass awards at Metro Meats' Noarlunga abattoir on Friday last week.

Slapping the scales at 536 kg liveweight dressing 311 kg, the massive steer, Temna Knap, returned a 58 pc dressing percentage and a near perfect 95 points from a rib 100 to secure the top on hook.

Carcass information showed ideal B muscle, with color, texture and firmness of muscle being cherry, smooth and firm with ideal color and texture to the fat cover.

Top steer SA bred

casino beef forward to yogle couple

By KEVIN ELSLEY

A little help from South Australian bloodlines, a young couple from Rukermain, near Adelaide, exhibited the grand champion led steer at Cannon Creek last Saturday.

Mr and Mrs Nicholas are busy farmers and regularly take in led steer events with the prize money they buy from other breeders.

SALE INFORMATION & CONDITIONS

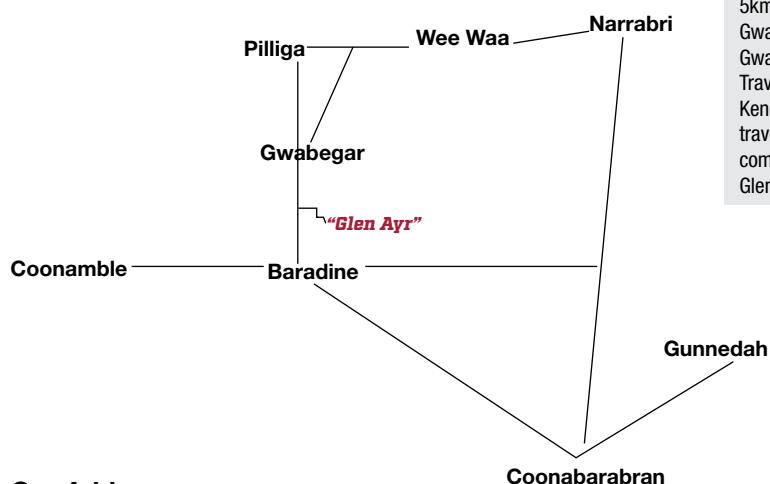

- **Inspection** – We encourage prospective buyers to inspect the cattle prior to sale. This gives us the opportunity to assist in selection of the best genetics for your particular requirements. Inspection on Sale Day will be from 10 am.
- **Supplementary Sheet** – Up to date weights, scrotal size and scanning data will be supplied.
- **Breeding Guarantee** – Bulls have been semen tested and breeding soundness assessed prior to sale. In the unlikely event of infertility, the vendor guarantees that (without expenses, interest, cost and damages) if the bull proves to be totally infertile or totally incapable of natural service, provided it is not caused by an injury or disease contracted since leaving the sale, to either replace with an animal of comparable value or credit to the full purchase price will be given at the next sale or on a private sale animal. Any complaint must be lodged with a relevant Veterinary Certificate within 6 months of the date of Sale direct to the Vendor. Bulls that run in a multiple joined environment are not guaranteed for breakdown or injury.
- **Health** – TB & Brucellosis free herd and stock are free to move anywhere in Australia. BJD Status is 6.

All bulls have been tested negative to Bovine Pestivirus and vaccinated against Vibrio and 5 in 1.

- **Buyers Orders & Phone link up** – Buying orders will be diligently executed by a person nominated by you to act on your behalf. Bidding by phone will be available. Contact Jason or your preferred agent 48hrs prior to sale to make arrangements for phone numbers and time.

- **Intending buyers please note** – Buyers numbers system will be in operation, therefore all prospective purchasers will be required to register prior to the commencement of the sale.
- **Insurance** – Insurance representatives will be in attendance on Sale Day. We encourage you to insure all purchases.
- **Personal transport** – We can arrange transport to and from “Glen Ayr”, please contact the selling Agent or Vendors. The closest major airport is Dubbo 2.25 hrs. Air strip available on request at Baradine for private planes.
- **Accommodation** –
Reggies Tattersalls Hotel
 Baradine - 0467 900 153
Thirsty Farmer
 Baradine - 02 6843 1649
- Refreshments for morning tea and a light lunch will be supplied prior to the Sale.
- **Please Note** –
 - It is unethical for anyone to promote, advertise or arrange the sale of any cattle, other than those in the sale, on the sale premises.
 - The Vendors will not be responsible for any errors or omissions in this catalogue.
 - GST will be added on the fall of the hammer to purchase price.
 - All cattle will have their NLIS buttons and will be transferred to successful purchaser's number by selling agent at completion of sale.

LOCATION MAP

Our Address:
1466 Wangmans Rd Kenebri NSW

FROM NARRABRI

Go to Wee Waa then towards Pilliga. Go past the Cuttabri Wine Chanti about 5km and take the turn left towards Gwabegar. At the crossroads in Gwabegar turn left towards Baradine. Travel approx. 18km and just before Kenebri turn left onto Wangmans Rd, travel 2km down this road and as you come out of the dog leg in the road Glen Ayr is on the Right.

FROM COONABARABRAN

Travel to Baradine until you get to a T section. Turn Left towards Coonamble and before the railway line turn Right towards Pilliga. Travel 20km as you are coming out of Kenebri take Wangmans Rd, the dirt road to your right, travel 2km down this road and as you come out of the dog leg in the road Glen Ayr is on the Right.

FROM COONAMBLE

Travel to Baradine until you get to the railway line. Turn left after the line towards Pilliga. Travel 20km as you are coming out of Kenebri take Wangmans Rd, the dirt road to your right, travel 2km down this road and as you come out of the dog leg in the road Glen Ayr is on the Right.

IMPORTANT NOTICES

The selling Agent, its members, subsidiary or related corporations, officers, agent and employees for themselves and for those for whom they act, while exercising due care provide all information without responsibility and give no guarantee whatsoever as to its accuracy. All persons who attend the sale do so entirely at their own risk and the Selling Agent, its members, subsidiary or related corporation, officers, agents, employees and its principals for themselves and for those for whom they act, do not assume or accept any responsibility or liability of whatever nature for an injury or damage whatsoever which may occur.

UNDERSTANDING THE IGS EPD SUITE

MATERNAL EPDS

CALVING EASE DIRECT (CE-D)

Reported as the percentage of extra unassisted births in first calving heifers, relative to the average. CE-D is relative to the direct Calving Ease of the animal. Higher values are more favourable.

CALVING EASE MATERNAL (CE-M)

Reported as the percentage of extra unassisted births in first calving heifers, relative to the average. CE-M is relative to the Calving Ease of the daughters of the animal. Higher values are more favourable.

MILK

Reported as pounds of weaning weight of progeny from the animals daughters, relative to the average. Predicts the difference in maternal production of daughters relative to milk production and mothering. Values are relative to the environment of the production system. Low input environments should be very conscious of introducing too much milk due to the increased nutrient requirements that it can place on cows.

MATERNAL WEANING WEIGHT

Reported as pounds of weaning weight of progeny from the animals daughters, relative to the average. This is a measure of weaning weight differences relative to the combined effects of growth and milk. Breeders who are not looking to change milk production should consider Total Maternal as the most relevant EPD for maternal weaning weights. Higher values are more favourable.

STAYABILITY (STAY)

Reported as the differences in percentage of a sire's offspring that are predicted to still be in the herd at 6 years of age . . . given that they calved at 2, relative to the average. Stayability is a measure of reproductive longevity. Higher values are more favourable.

DOCILITY

Reported as the percentage of progeny, relative to the average, that will record a score of docile. Higher values are more favourable.

GROWTH EPDS

BIRTH WEIGHT

Reported in pounds of birth weight relative to the average. When selecting bulls to use on heifers, breeders should also focus on the Calving Ease EPD as Birthweight is already used in the Calving Ease EPD calculation.

WEANING WEIGHT – ADJUSTED TO 205 DAYS

Reported in pounds of weaning weight of direct progeny, relative to the average. Higher values are usually more favourable dependant on its relationship with birthweight.

YEARLING WEIGHT – ADJUSTED TO 365 DAYS

Reported in pounds of yearling weight of direct progeny, relative to the average. Higher values are usually more favourable dependant on its relationship with birthweight.

CARCASE EPD'S – ADJUSTED TO 475 DAYS OF AGE

CARCASE WEIGHT

Reported as pounds of Carcase Weight relative to the average. Higher values are usually more favourable, however this is relevant to each producers target market.

RIB EYE AREA

Reported as square inches relative to the average. Higher values are usually more favourable.

FAT

Reported as inches of back fat relative to the average. Higher values are usually more favourable, however this requires a balance between adequate doing ability in daughters and carcase fat thresholds for target markets.

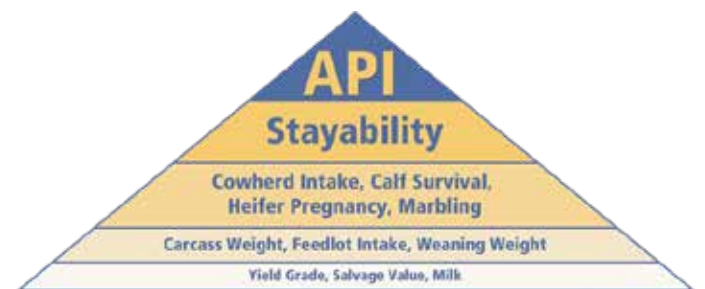

YIELD GRADE

Reported as expected differences in progeny average USDA Yield Grade scores. Yield Grade is used to improve the yield potential of progeny and may see a strange value for Australian animals. Whilst Australian animals will never receive a USDA graded Yield Grade score, they will also never receive an actual Retail Beef Yield % value either. However, US Shorthorns (including progeny of Australian sires used in the US) are USDA graded each year and so the pedigree linkages provide linkage to actual USDA Yield Grade values. Lower values are usually more favourable, however because of the negative correlations between fat and yield it is important to maintain some balance in the selection.

MARBLE SCORE

Reported as the differences in actual carcase marble scores relative to the average. This is different to IMF% which is used as an indicator trait in Marble Score. Higher values are more favourable.

ALL PURPOSE INDEX – API

Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ Indexes come in. Through well conceived, rigorous mathematical computation, \$ Indexes blend EPD's and economics to estimate an animal's overall impact on your bottom line.

The All Purpose \$Index (API) evaluates sires for use on the entire cow herd, bred to both first-calf heifers and mature cows, with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put onto feed and marketed for both quality grade and yield.

UNDERSTANDING ACCURACIES

BOLT EPD accuracies have experienced the most change, usually lowering numerically and especially for non-parent animals, however the reported accuracy will be more accurate.

Accuracy refers to the amount a reported EPD can possibly change as more data is added. EPD values with higher accuracy result in less possible change for the value over time. More accurate accuracies better represent the amount of possible change for each EPD.

Welcome to our 17th Annual On Property Sale

Dear Beef Producers,

Welcome to our 2025 On Property Bull Sale! We're excited to extend this invitation to view our offering and sincerely thank you for your ongoing interest and support.

This year, we are proud to present a draft of 60 Shorthorn Bulls and 40 Charolais Bulls. The bulls have been selected with a balanced approach focusing on those that will breed optimal performance and profit driving traits which will be passed on to their progeny. Our breeding goals continue to prioritise the characteristics that will best serve commercial and seedstock producers alike.

This year is especially significant as we proudly mark **50 years of Temana Charolais bloodlines**. The journey began in 1975 when Terry and Maylene started preparing Charolais-cross steers for carcase competitions. Their remarkable performance ignited a passion that inspired them to AI their base herd of Red Poll, Angus, Friesian, and Murray Grey cows with the Charolais sire Lazy JR Cadet.

In 1980, they took a major step forward by acquiring the Redvale Charolais herd from Oakey, QLD. Purchasing 40 cows and the influential full-French sire Piccadilly Blue Blood. His progeny have since established a lasting legacy within the Temana breeding program, helping to shape the high-quality genetics we continue to offer today.

From winning their first Grand Champion carcase in 1978, to taking out **Supreme Champion Exhibit at the 1992 Sydney Royal Show** at the **Charolais World Congress** with Temana Joshua, it has been a remarkable journey. Temana bloodlines have been used widely across Australia, including by leading pastoral companies such as AA Co, Austral Downs, Brunette Downs, and Stanbroke Pastoral Co who purchased Temana Masterpiece the sire of some of this year's sale bulls. Another of their proudest moments was breeding the **Brisbane Royal (EKKA) Jackpot steer winner**. Above all, the greatest reward has been building long-standing relationships with producers—some who have supported by purchasing bulls for over 35 years.

Our Shorthorn offering is the largest single-vendor draft in NSW this year and showcases the breed's superior marbling traits. Likewise, our Charolais bulls continue to impress with their carcase yield and ease of finishing, making them an ideal fit for a range of breeding programs. The bulls with **PP** are homozygous polled and will only produce polled calves, even when joined to a horned cow.

We know that choosing the right genetics is critical to the long-term success of your operation. That's why we encourage you to inspect the bulls prior to sale. Join us for our **Bull Walk Day on Wednesday, 13th August**, where you can view the draft, discuss performance data, and assess how our genetics align with your program goals.

We're here to assist you in any way we can—please don't hesitate to contact us with questions or to arrange a visit before the sale. We look forward to welcoming you, showcasing our 2025 lineup, and sharing our hospitality.

Warm regards,
Jason, Kylie, Riley and Jess

QUICK GUIDE - Using Breeding values to drive Profitability and Genetic gain in a beef production system

Longterm gains require direction (goal setting), commitment and consistency. It's easy to fall into the trap of trying to fix deficits in one generation.

Quick Guide

- Select 3 of the most important traits for your herd to improve
- % Ranking - Compares the Shorthorn Beef population - 1% being the highest
- API Index - extra \$\$\$ profitability of his progeny when joined to the entire cow herd, with his daughters retained and his steers fed for both carcase quality and carcase yield.
- Example is if Bull A has an API index figure of 125 and Bull B has and API of 50 the difference is \$75. If both bulls joined to 40 cows a year for 4 years the difference in profitability would be \$12,000

$$40 \text{ Cows} \times 4 \text{ years} \times \$75 = \$12,000$$

NOTES: This young sire is what I consider to be the best bull of my entire breeding career. Unsurpassed is a culmination of many decades of stringent objective measurements and selection for the most beneficial economic traits, combined with the highest level of calving ease, growth, high maternal function and carcase merit. Unsurpassed is not only one of the lightest calves born in his year at Futurity he is the heaviest bull in the draft, has perfect structure, tremendous capacity and faultless disposition. This young sire's Dam is a maternal sister to Futurity Uptime U673 LOT 41 in this year's sale. Please inspect to see the quality and consistency of both these sires. **Selling full possession and 50% semen sales.**

Top 2% Calving ease, Birth weight, Carcase weight and API, Top 10% Yearling weight and Stayability, Top 20% Fat, Top 30% Marbling.

	CE	BW	WW	YW	Milk	MCE	MWWT	STAY	DOC	CW	REA	FAT	MARB	YG	API

%Rank	2	2	45	10	45	10	40	10	90	2	45	20	30	100	2

MATERNAL

Maximising fertility & weaning rates increases kg/Ha
Efficient females that last longer in herd & produce more beef for less

GROWTH

Optimise Growth, not maximise.
Too much too late can create production issues.
Selecting for fast early growth to maximise turnoff, market compliance and female efficiency.

CARCASE

The only new money in the beef industry comes from consumers.
Increasing marble scores increases eating quality and increases demand.

To gain a greater understanding of each trait refer to page 5 of our catalogue - Understanding the IGS EPD Suit

REFERENCE SIRES

FUTURITY NEXT LEVEL N326

Colour: Red Ident. No.: JJJN326

Sire: FUTURITY EDGED IN STONE K148 (P)

Dam: FUTURITY OSSIE MARY ANN G81 (P)

We continue to use this proven sire for the absolute growth and carcass performance he brings to our program. Next Level has sons sell to \$85000 and breeds cattle with excellent constitution and more volume and capacity than most.

Colour: Red Ident. No.: MUSAAR4317661

Sire: LEVELDALE COWBOY UP 820F (P)

Dam: GILMAN'S DURHAM 5F (P)

We purchased the Australian semen rights in Liberty Valance for his out cross genetics, outstanding data set and length of body. Liberty Valance is breeding cattle with a lot of growth for age, good constitution and excellent carcass quality. Liberty Valance has a small composite of Red Angus in his pedigree. Progeny of Liberty Valance will grade as HBR if used on HBR females.

FUTURITY SHIRAZ S601

Colour: Roan Ident. No.: JJJS601

Sire: DAMO PARK TIPPERARY M022 (P)

Dam: FUTURITY KOKODA'S AUGUSTA N28 (P)

We are really happy with the first draft of the Shiraz bulls. They are long bodied, easy finishing with easy going natures. Sold to Tim and Will Bowman and Toongi Pastoral for \$70000 in 2023 and commercially is doing a terrific job. The first of his steer will be tested for carcass attributes this spring and we are confident of a good result. Shiraz daughters might be his biggest strength, they have perfect udders, hold condition well and are delivering great maternal profitability.

FUTURITY SCOTCH FILLET S373

Colour: RLW Ident. No.: JJJS373

Sire: JSF TIMES SQUARE 120G ET (P)

Dam: FUTURITY MASTERS WENDY Q128 (P)

What an outstanding first run of bulls from this exciting young sire. We used Scotch Fillet over heifers in 2023 through AI and continue to do so due to his outstanding calving ease and the quality of cattle he is breeding. His progeny are medium framed, have excellent constitution, short coated and display outstanding carcass shape. Very profitable data set on this sire, he simply just ticks all the boxes.

FUTURITY RINGER R328

Colour: Red Ident. No.: JJJR328

Sire: FUTURITY NEXT LEVEL N326 (P)

Dam: FUTURITY GIGABYTES ENIA M168 (P)

First season sons by this exciting sire. **Ringer is number one bull in the Shorthorn breed for Marbling** and has a very balanced data set across a range of profitable traits. Ringer was sold to progressive beef producers Wambara Pastoral and has excelled in a commercial setting as the calf getter. Holding his condition and growing into an impressive individual. We will continue to use this sire for his outstanding carcass attributes, constitution and easy-going nature.

BAYVIEW DAYTONA Q34

Colour: Roan Ident. No.: HT Q34

Sire: BAYVIEW ARCHER M15 (P)

Dam: BAYVIEW MISS BEAUTY M10 (P)

Daytona has turned out to be a super sire. Daytona certainly turns the dial on for Marbling and calving ease regardless of who you join him to. **Daytona is the third highest proven Shorthorn sire on the Shorthorn Beef data base for Marbling and the second highest for Calving Ease and the lightest for Birth weight.** Daytona's progeny are thickly made, sound structured, have good hoof shape and have outstanding constitution. This sire's daughters have perfect shaped udders and hold their condition when in lactation.

Are you leaving profit on the table?

Every breeding decision can impact your bottom line.

With Profit-Driven Genetics, you can:

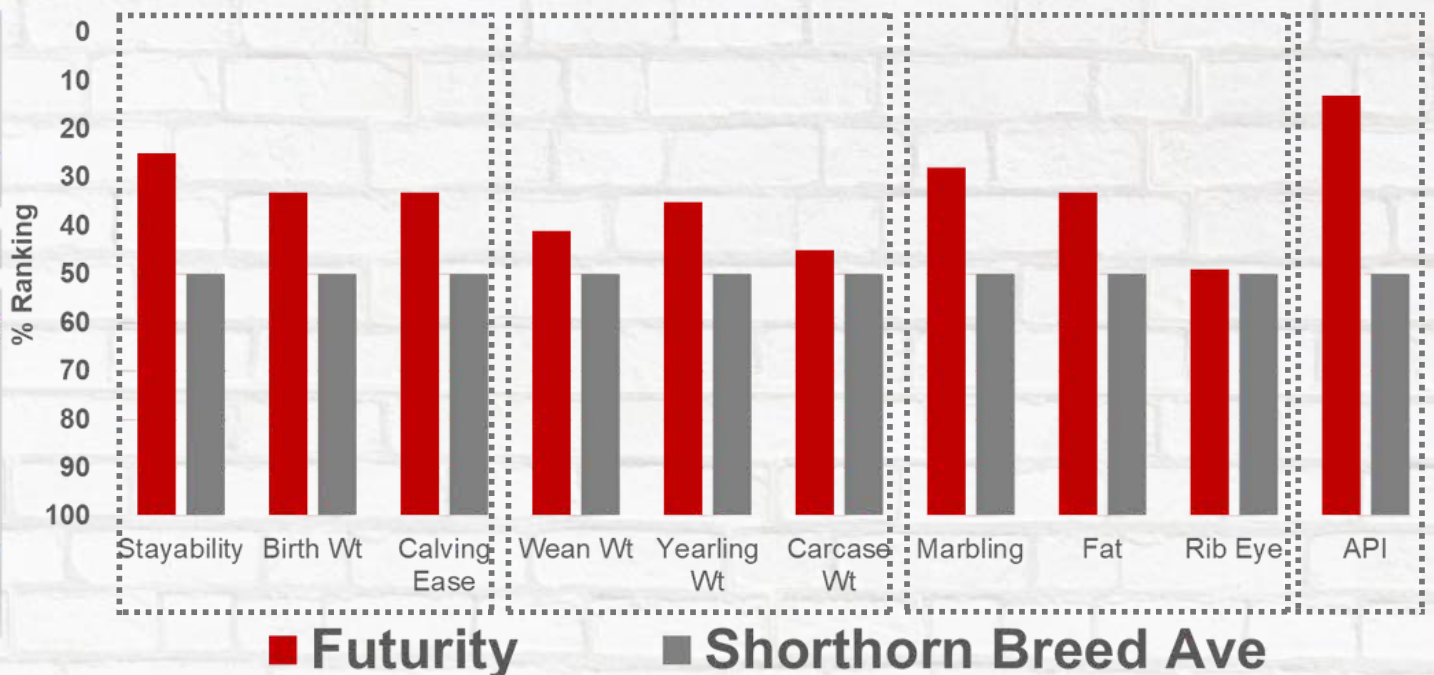

- ✓ Improve herd fertility, growth, and feed efficiency
- ✓ Enhance carcass traits to meet market demand
- ✓ Make smarter selections backed by performance data
- ✓ Build long-term profitability into your breeding plan

It's not just about genetics – it's about making genetics work for your business.

Why choose Futurity?

- Cattle that look like they will perform, backed by performance data that proves they will.
- Decades of performance recording, breeding for commercial profitability.
- Performance-focused selection for fertility, maternal attributes, structure, and carcass traits.
- Futurity bulls are bred to perform in real-world commercial operations and deliver long term value across generations.

NOTES: This young sire is what I consider to be the best bull of my entire breeding career. Unsurpassed is a culmination of many decades of stringent objective measurements and selection for the most beneficial economic traits, combined with the highest level of calving ease, growth, high maternal function and carcass merit.

Unsurpassed is not only one of lightest calves born in his year at Futurity he is the heaviest bull in the draft, has perfect structure, tremendous capacity and faultless disposition. This young sire's Dam is a maternal sister to Futurity Uptime U673 LOT 41 in this year's sale. Please inspect to see the quality and consistency of both these sires. **Selling full**

possession and 50% semen sales.

Stress Less Bull Delivery - Freight Rebate

Let us take the stress and expense out of your bull deliveries. Deliveries can be arranged to the purchasers property at \$100 per bull up to 400km or NSW borders on major routes and to Roma QLD. This will only apply if freight is arranged by Jason.

While every care will be taken, no responsibility can be accepted for injuries whilst awaiting delivery. Bull insurance coverage is recommended.

SALE NOTES

*Thank you for attending our 2025 Bull Sale.
We wish you all a safe trip home!*

Futurity Network Advantage

Client Services

- **Marketing Assistance**

Assistance promoting and marketing of your commercial livestock is a service we offer to those using Futurity genetics. Market Alert emails are sent throughout our network with the details of your livestock to producers, agents, and livestock buyers. Your cattle will gain greater exposure and potential premiums.

- **Livestock Classification**

“Free classing of females” - working with producers to assist in the development of a breeding plan to maximise potential to meet target markets and goals. Contact us to discuss your breeding program, livestock classification or to select genetics that will be most profitable for your operation. This collaborative approach also enables insight as to how the genetics are performing.

- **Progeny Test Program**

Partnering with Commercial producers in a Progeny Test program to follow the male and female progeny, collecting information on female production and the steers. The information is fed back to be genetically evaluated to identify quality carcass genetics.

- **Beef Technology Days**

Beef Technology days are part of a service we offer to all breeders of beef. Industry relevant key note speakers share information and updates with producers. These days are also beneficial for networking and for the “Cow Nerds” to talk bull all day!

- **Newsletter**

[Scan here](#) to receive our newsletters and keep up to date with the happenings at Futurity. Also be the first to know of market alert sales listings.
