The Brand of Consistent Quality

Annual On Property Sale

110 Bulls
Shorthorns
& Charolais

Thursday
31st August 2023, 1pm

QUICK GUIDE - Using Breeding values to drive Profitability and Genetic gain in a beef production system

Longterm gains require direction (goal setting), commitment and consistency. It's easy to fall into the trap of trying to fix deficits in one generation.

Quick Guide

- Select 3 of the most important traits for your herd to improve
- % Ranking - Compares the Shorthorn Beef population - 1% being the highest
- API Index - extra \$\$\$ profitability of his progeny when joined to the entire cow herd, with his daughters retained and his steers fed for both carcass quality and carcass yield.
- Example if Bull A has an API index figure of 125 and Bull B has and API of 50 the difference is \$75. If both bulls joined to 40 cows a year for 4 years the difference in profitability would be \$12,000

40 Cows X 4 years X \$75 = \$12,000

5 FUTURITY SHIRAZ S601 (PP)

Born: 09/08/2021 Colour: Roan Ident. No.: JJJS601

WEEBOLLABOLLA THEODORE T85 (P)

MATERNAL

Maximising fertility & weaning rates increases kg/ha
Efficient females that last longer in herd & produce more beef for less

GROWTH

Optimise Growth, not maximise.
Too much too late can create production issues.
Selecting for fast early growth to maximise turnoff, market compliance and female efficiency.

CARCASS

The only new money in the beef industry comes from consumers.
Increasing marble scores increases eating quality and increases demand.

To gain greater understanding of each trait refer to page 3 of our catalogue - Understanding the IGS EPD Suit

The Brand of Consistent Quality

**Wednesday 9th August
10.30am - 3pm**

Dear Beef Producer

We would like to invite you to our Annual Beef Technology and Bull Walk day.

This year we are excited to have two well regarded Industry professionals to present on relevant topics for improvement and sustainability.

Simon Quilty -
Independent Meat and Livestock Analyst

Market Update & Future Forecast

Carbon sequestration and methane reduction

- How it all works and should you be involved?
- Research findings from his recent project aimed to investigate methane reduction schemes in the livestock sector worldwide to reward farmers for lowering methane emissions.

Emily Perkins -
*Breed Development and Project Manager
Shorthorn Beef*

Marbling it's more than Genetics

- Key management strategies to improve marbling and meat quality

RSVP: Monday 7th August for catering

2023 Bull Sale
Thursday 31st August 1 pm

catts@futuritypastoral.com

www.futuritypastoral.com

Welcome to our 15th Annual On Property Sale

Thank you for taking the time to view our 2023 catalogue. This year will see 110 Bulls on offer including 40 Charolais and 70 Shorthorn bulls. This is the largest offering of Shorthorn Bulls in NSW, from one Vendor, one Sale, Raised Recorded and Prepared the same. We believe this offering of Shorthorn bulls to be the highest Marbling group of sires to be offered in Australia in 2023.

The Charolais bulls on offer also stand out for their carcase attributes whether it for their high yielding carcasses or ability to finish with ease and marbling genetics.

Over the last several years, with the use of performance recording, genomics and progeny testing we have made rapid advancements in carcase quality in our herd allowing us to stand out from the crowd.

Our goals have always been simple “provide cattle that add value and profitability throughout the supply chain”. Easy care cattle for the cow calf producers, cattle that have rapid growth in the feed yard and cattle that have excellent carcase characteristic and eating quality for the processor and consumer.

About the Bulls

The bulls have been prepared for the sale with a working life in mind. Due to dry conditions the bulls have been supplemented with silage until going onto grazing oats in July. The Shorthorn and Charolais bulls have had the same management.

We are confident this is the most even and functional line of Shorthorn bulls we have offered at Futurity and are confident of their capabilities when compared with other shorthorns or other breeds. The bulls will pass on their excellent genes for calving ease, fertility, longevity, growth, and carcase quality and they are a very docile group. The bulls have been run in one contemporary group for all their data recording.

The line of Charolais bulls this year are performance recorded and are an ideal fit for many crossbreeding programs and a few Stud sire prospects amongst the draft. The Charolais bulls are displaying the soft fleshing, medium frame, and easing finishing, typical of the Temana/Futurity breeding.

With increased interest for Futurity genetics going into Queensland we have taken the step to *Three Germ Blood all sale and paddock bulls to be sold in 2023*

All bulls have been DNA tested and Sire verified. The bulls with PP have been tested homozygous polled and will only breed polled calves, even when joined to a horned cow. *EPD's and EBV's with shading are in the Top 30% of their breed.*

We encourage viewing of the cattle prior to the sale if possible. We believe this is an investment in your business. Seek to find the best combination of genetics, performance data and physical attributes to improve profitability. Your investment now will reap rewards in the future. We would like to assist in advising you on the purchase that will be most profitable for your operation so please ask if you would like any assistance.

We will be hosting a Beef Technology and Bull walk day on **Wednesday 9th August**. All sale bulls will be on display, and we invite you to come along and enjoy our hospitality.

Kind Regards

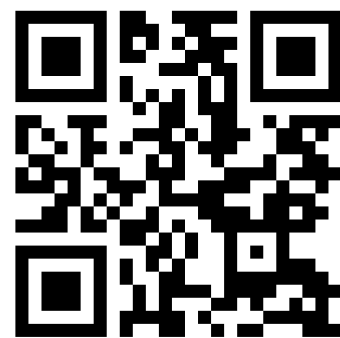

Jason, Kylie, Riley and Jess

UNDERSTANDING THE IGS EPD SUITE

MATERNAL EPDS

CALVING EASE DIRECT (CE-D)

Reported as the percentage of extra unassisted births in first calving heifers, relative to the average. CE-D is relative to the direct Calving Ease of the animal. Higher values are more favourable.

CALVING EASE MATERNAL (CE-M)

Reported as the percentage of extra unassisted births in first calving heifers, relative to the average. CE-M is relative to the Calving Ease of the daughters of the animal. Higher values are more favourable.

MILK

Reported as pounds of weaning weight of progeny from the animals daughters, relative to the average. Predicts the difference in maternal production of daughters relative to milk production and mothering. Values are relative to the environment of the production system. Low input environments should be very conscious of introducing too much milk due to the increased nutrient requirements that it can place on cows.

MATERNAL WEANING WEIGHT

Reported as pounds of weaning weight of progeny from the animals daughters, relative to the average. This is a measure of weaning weight differences relative to the combined effects of growth and milk. Breeders who are not looking to change milk production should consider Total Maternal as the most relevant EPD for maternal weaning weights. Higher values are more favourable.

STAYABILITY (STAY)

Reported as the differences in percentage of a sire's offspring that are predicted to still be in the herd at 6 years of age... given that they calved at 2, relative to the average. Stayability is a measure of reproductive longevity. Higher values are more favourable.

DOCILITY

Reported as the percentage of progeny, relative to the average, that will record a score of docile. Higher values are more favourable.

GROWTH EPD'S

BIRTH WEIGHT

Reported in pounds of birth weight relative to the average. When selecting bulls to use on heifers, breeders should also focus on the Calving Ease EPD as Birthweight is already used in the Calving Ease EPD calculation.

WEANING WEIGHT – ADJUSTED TO 205 DAYS

Reported in pounds of weaning weight of direct progeny, relative to the average. Higher values are usually more favourable dependant on its relationship with birthweight.

YEARLING WEIGHT – ADJUSTED TO 365 DAYS

Reported in pounds of yearling weight of direct progeny, relative to the average. Higher values are usually more favourable dependant on its relationship with birthweight.

CARCASE EPD'S – ADJUSTED TO 475 DAYS OF AGE

CARCASE WEIGHT

Reported as pounds of Carcase Weight relative to the average. Higher values are usually more favourable, however this is relevant to each producers target market.

RIB EYE AREA

Reported as square inches relative to the average. Higher values are usually more favourable.

FAT

Reported as inches of back fat relative to the average. Higher values are usually more favourable, however this requires a balance between adequate doing ability in daughters and carcase fat thresholds for target markets.

YIELD GRADE

Reported as expected differences in progeny average USDA Yield Grade scores. Yield Grade is used to improve the yield potential of progeny and may seem a strange value for Australian animals. Whilst Australian animals will never receive a USDA graded Yield Grade score, they will also never receive an actual Retail Beef Yield % value either. However, US Shorthorns (including progeny of Australian sires used in the US) are USDA graded each year and so the pedigree linkages provide linkage to actual USDA Yield Grade values. Lower values are usually more favourable, however because of the negative correlations between fat and yield it is important to maintain some balance in the selection.

MARBLE SCORE

Reported as the differences in actual carcase marble scores relative to the average. This is different to IMF% which is used as an indicator trait in Marble Score. Higher values are more favourable.

ALL PURPOSE \$INDEX – API

Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ Indexes come in. Through well conceived, rigorous mathematical computation, \$ Indexes blend EPD's and economics to estimate an animal's overall impact on your bottom line.

The All Purpose \$Index (API) evaluates sires for use on the entire cow herd, bred to both first-calf heifers and mature cows, with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put onto feed and marketed for both quality grade and yield.

UNDERSTANDING ACCURACIES

BOLT EPD accuracies have experienced the most change, usually lowering numerically and especially for non-parent animals, however the reported accuracy will be more accurate.

Accuracy refers to the amount a reported EPD can possibly change as more data is added. EPD values with higher accuracy result in less possible change for the value over time. More accurate accuracies better represent the amount of possible change for each EPD.

REFERENCE SIRES

FUTURITY PROPHECY

Colour: Red Ident. No.: JJJP13

Sire: **CRATHES HASTINGS (P) Red**

Dam: **FUTURITY ENIA H8 (P) Red**

What a carcass sire Prophecy has turned out to be. With nearly 200 progeny analysed from multiple herds there is no denying the value this bull is bring to the breed. Rarely do we find a proven sire that can supply such high levels of Marbling, Rib Eye Area and Growth. Prophecy's progeny have high docility and his daughters are easy care females.

Colour: Roan Ident. No.: MCAN479289

Sire: **NORTHERN LEGEND 3N (P) White**

Dam: **FRASER'S RIPPER MILLICENT (P) Red**

We selected this proven Homozygous Polled Canadian sire for his outstanding calving ease, marbling finishing ability and excellent constitution. Dr Pepper, and his progeny's structure and feet are perfect. He was awarded the Champion Shorthorn bull at Agribition and Farm Fair in 2018. We have found his progeny to have excellent calving ease, are very easy doing, quick to finish and docile.

Sire: **SASKVALLEY TRADITION 106T (P) Red**

Dam: **KL GOLD ROSE (P) Roan**

We selected Time Square for his calving ease, marbling, finishing ability and Stayability that he can bring to his progeny. We used Time Square predominantly on heifers and have found his calving ease excellent, his progeny is very easy doing and finishing with high marbling. We believe Time Square daughters will add a lot of maternal profitability to our herd.

REFERENCE SIRES

BAYVIEW DAYTONA Q34

Colour: Roan Ident. No.: HT Q34

Sire: BAYVIEW ARCHER M15 (P) Red

Dam: BAYVIEW MISS BEAUTY M10 (P) Roan

We selected Daytona for his carcass shape, disposition, calving ease and carcass characteristics. I don't think we have used a bull with the reliability of calving ease as Daytona, he is a true heifer specialist. Dayton's progeny is mid maturity easy finishing, docile and have exception carcass data.

Reserve Champion Light Middle Weight

Congratulation to Calrossy students and teacher Kathy de Jong for being awarded the Reserve Champion Light Middle Weight steer on hoof with a Futurity steer, at the Wingham Beef Week. The 12 month old, pure shorthorn steer was very competitive amongst cross bred and European breed animals. In the carcass results receiving full marks for carcass specifications and eating quality MSA index 61.63 to receive a 2nd place with total points of 86.37. The steers sire Daytona is in the Top 1% of the breed for Calving ease, Birth Weight, Maternal calving ease, Marbling and API. The first of his progeny will sell in this year's sale Lots 68 to 75. Events like the Beef Week are a great opportunity for young people to experience and be part of the Beef Industry. We like to encourage and support this type of event to help grow future leaders.

2023 JBS Thousand Guineas Supplier Performance Awards

Congratulations to Wallumburrawang Pastoral

For placing 2nd in the Thousand Guineas Supplier Performance Awards. The Luckie Family are committed to genetic progression and have used Futurity bulls in their breeding program for nearly 10 years.

CRITERIA

- Verified & accredited Shorthorn producers are eligible
- Processing time frame for performance consideration: May 2022 – May 2023
- Multiple consignments are eligible with a minimum of 20 cattle in each consignment
- Awards are based on overall highest % in performance time frame and meeting all the criteria
- Have met the JBS supply specifications at induction time (weight & dentition, Bovilis MH + IBR pre-vaccinated)
- Have met Thousand Guineas brand specifications at the time of production
 - AusMeat marble Score 2+
 - Meat Colour 1B - 3
 - 0 - 4 Teeth

***Become a Thousand Guineas
Shorthorn Beef Supplier***

THE STORY OF THOUSAND GUINEAS

The Shorthorn breed keeps the **oldest breed registry** in the world.

The story begins in the North East of England in the **18th century**, where Teeswater & Durham cattle breeds were being refined using selective breeding techniques by Charles and Robert Colling. This program would go on to give rise to one of the most highly sought-after beef cattle breeds in the world.

In 1810, a world record 1,000 Guineas was paid for a Foundation Sire of this Shorthorn breed. In 1825 the first registered Shorthorn cattle arrived in Australia, imported by Potter McQueen in Scone, NSW.

This bloodline would go on to be a key influencer in modern Shorthorn breeds. Today's Shorthorn cattle are noted for their **excellent meat quality and marble score**.

1700's

Originated in England and Scotland, having evolved from a different breed of shorthorn cattle that had lived in the area since the 16th century.

1825

The first registered Shorthorn cattle arrived in Scone, NSW.

2022

The Shorthorn breed is found throughout most areas of Australia under most climatic and environmental conditions.

1810

A world record 1,000 Guineas paid for a Foundation Sire.

1999

Shorthorn society established research and development facility near Orange, NSW to enhance Shorthorn genetics.

Progeny testing and Performance recording

With the aid of genomic technology and carcass data collection through the JBS Thousand Guineas program Futurity has embarked on a period of accelerated genetic gain. Thank you to the commercial producers and JBS who partner with us in our progeny testing program. The program has allowed us to improve our carcass accuracies and identify bulls out of the program with high carcass merit, and then disseminate these higher accuracy genetics back through the herd.

We have a genuine commitment to objectively measuring all cattle born at Futurity to the highest level. All calves are DNA profiled, birth weighed, weighed for growth, scan and carcass data, docility scored and measured for female longevity. **We are proud of our integrity & credibility in this field.**

48 FUTURITY STAVROS S389

Stress Less Bull Delivery - Freight Rebate

Let us take the stress and expense out of your bull deliveries. Deliveries can be arranged to the purchasers property at \$100 per bull up to 400km or NSW borders on major routes and to Roma QLD. This will only apply if freight is arranged by Jason.

While every care will be taken, no responsibility can be accepted for injuries whilst awaiting delivery. Bull insurance coverage is recommended.

Stress Less Bull Delivery - Freight Rebate

Let us take the stress and expense out of your bull deliveries. Deliveries can be arranged to the purchasers property at \$100 per bull up to 400km or NSW borders on major routes and to Roma QLD. This will only apply if freight is arranged by Jason.

While every care will be taken, no responsibility can be accepted for injuries whilst awaiting delivery. Bull insurance coverage is recommended.

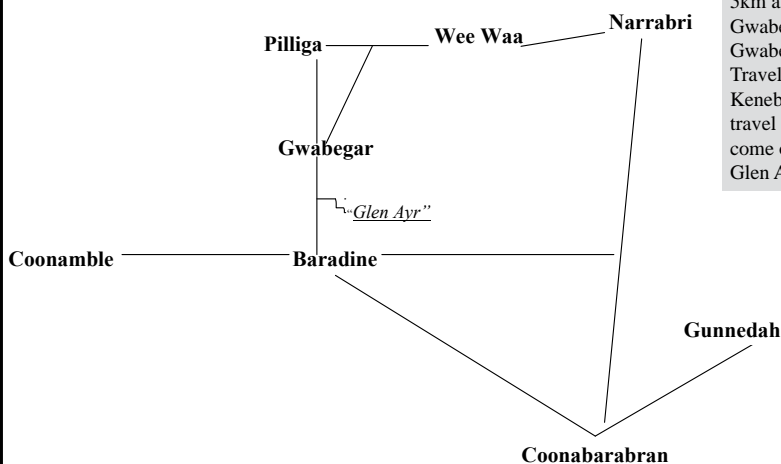

SALE INFORMATION & CONDITIONS

- **Inspection** – We encourage prospective buyers to inspect the cattle prior to sale. This gives us the opportunity to assist in selection of the best genetics for your particular requirements. Inspection on Sale Day will be from 10 am.
- **Supplementary Sheet** – Up to date weights, scrotal size and scanning data will be supplied.
- **Breeding Guarantee** - Bulls have been semen tested and breeding soundness assessed prior to sale. In the unlikely event of infertility, the vendor guarantees that (without expenses, interest, cost and damages) if the bull proves to be totally infertile or totally incapable of natural service, provided it is not caused by an injury or disease contracted since leaving the sale, to either replace with an animal of comparable value or credit to the full purchase price will be given at the next sale or on a private sale animal. Any complaint must be lodged with a relevant Veterinary Certificate within 6 months of the date of Sale direct to the Vendor. Bulls that run in a multiple joined environment are not guaranteed for breakdown or injury.
- **Health** – TB & Brucellosis free herd and stock are free to move anywhere in Australia. BJD Status is 6.
All bulls have been tested negative to Bovine Pestivirus and vaccinated against Vibrio, Tick Fever and 5 in 1.
- **Buyers Orders & Phone link up** – Buying orders will be diligently executed by a person nominated by you to act on your behalf. Bidding by phone will be available. Contact Jason or your preferred agent 48hrs prior to sale to make arrangements for phone numbers and time.
- **Intending buyers please note-** Buyers numbers system

will be in operation, therefore all prospective purchasers will be required to register prior to the commencement of the sale.

- **Insurance** - Insurance representatives will be in attendance on Sale Day. We encourage you to insure all purchases.
- **Personal transport** - we can arrange transport to and from “Glen Ayr” please contact the selling Agent or Vendors. The closest major airport is Dubbo 2.25 hrs. Air strip available on request at Baradine for private planes.
- **Accommodation-**
 - Peggies Tattersalls Hotel
Baradine - 0467 900 153
 - Thirsty Farmer
Baradine - 02 6843 1649
- Refreshments for morning tea and a light lunch will be supplied prior to the Sale.
- **Please Note** –
 - It is unethical for anyone to promote, advertise or arrange the sale of any cattle, other than those in the sale, on the sale premises.
 - The Vendors will not be responsible for an errors or omissions in this catalogue.
 - GST will be added on the fall of hammer to purchase price.
 - All cattle will have their NLIS buttons and will be transferred to successful purchaser’s number by selling agent at completion of sale

Our Commitment To Making The Cattle Better

THE HERD

Large contemporary groups managed under standard commercial conditions

Artificial Insemination (AI) programs of over 80% of all age females to increase genetic gain by individually choosing the best joining for each female

All calves are Birth Weighed and Calving Ease recorded on the day of birth

GENETIC EVALUATION

Growth rates and ultrasound scanning of all bulls and heifers as yearlings to identify cattle that marble at an early age. DNA samples are collected for Genomic evaluation.

Steers are sold into the Thousand Guineas program and their carcass data is obtained and fed back into the genetic evaluation system

Calves are temperament scored at weaning

PROGENY & PARTNERSHIP

Partnering with Commercial producers in a Progeny Test program to follow the male and female progeny collecting information on female production and the steers through the Thousand Guineas program. The information is fed back to be genetically evaluated to identify quality carcass genetics
