Annual On Property Sale

101 Bulls
Shorthorns
& Charolais

Thursday
29th August 2024, 1pm

Grain Free Preparation

QUICK GUIDE - Using Breeding values to drive Profitability and Genetic gain in a beef production system

Longterm gains require direction (goal setting), commitment and consistency. It's easy to fall into the trap of trying to fix deficits in one generation.

Quick Guide

- Select 3 of the most important traits for your herd to improve
- % Ranking - Compares the Shorthorn Beef population - 1% being the highest
- API Index - extra \$\$\$ profitability of his progeny when joined to the entire cow herd, with his daughters retained and his steers fed for both carcass quality and carcass yield.
- Example if Bull A has an API index figure of 125 and Bull B has and API of 50 the difference is \$75. If both bulls joined to 40 cows a year for 4 years the difference in profitability would be \$12,000

40 Cows X 4 years X \$75 = \$12,000

3 FUTURITY TANKED T552

Born: 13/08/2022 Colour: Roan Ident. No.: JJJT552

ROYALLA QUANTICO J011 (P)
BAYVIEW ARCHER M15 (P)
BAYVIEW MISS BEAUTY G72 (P)

Sire: BAYVIEW DAYTONA Q34 (P)

SPRYS ANNIES LEGEND F98 (P)
BAYVIEW MISS BEAUTY M10 (P)
BAYVIEW MISS BEAUTY F19 (P)

FUTURITY EDGED IN STONE K148 (P)
FUTURITY NEXT LEVEL N326 (P)
FUTURITY OSSIE MARY ANN G81 (P)

Dam: FUTURITY NL CARNATION R113 (P)

YAMBURGAN HECTOR J423 (P)
FUTURITY HECTORS CARNATION N14 (P)
FUTURITY CARNATION L108 (P)

NOTES: Tanked is the modern-day Shorthorn sire. He is thick, soft fleshed, easy doing and finishing. Not only does this young sire have a phenotype to suit most environments, he is backed up by data few can boast. Tanked will deliver exceptional calving ease, high growth, herd longevity and carcass excellence. Suitable for use on heifers.

Top 2% Calving ease and API, Top 5% Birth weight and Maternal calving ease, Top 10% carcass weight and Marbling, Top 15% Yearling weight, Top 20% Rib eye area, Top 25% Fat.

MATERNAL

Maximising fertility & weaning rates increases kg/Ha
Efficient females that last longer in herd & produce more beef for less

GROWTH

Optimise Growth, not maximise.
Too much too late can create production issues.
Selecting for fast early growth to maximise turnoff, market compliance and female efficiency.

CARCASS

The only new money in the beef industry comes from consumers.
Increasing marble scores increases eating quality and increases demand.

To gain a greater understanding of each trait refer to page 4 of our catalogue - Understanding the IGS EPD Suit

FUTURITY PASTORAL

The Brand of Consistent Quality

Thursday 29th August 2024

Thursday 8th August
10am - 3pm

We understand the importance of making informed decisions when selecting genetics for your herd. That's why we encourage you to view the bulls prior to the sale. Join us for our Beef Technology and Bull Walk Day on Thursday 8th August, where you can personally inspect the bulls, discuss their performance data, and learn more about how they can contribute to your breeding goals.

Morning tea and lunch provided at RSVP: Monday 5th August

Welcome to our 16th Annual On Property Sale

Dear Beef Producers,

Welcome to our 2024 On Property Bull Sale! We extend this invitation to view our offering and appreciate your interest and support.

At this year's sale, we are proud to present a draft of 101 bulls, including 61 Shorthorn Bulls and 40 Charolais Bulls. The bulls have been selected with a balanced approach focusing on those that will breed optimal performance and profit driving traits which will be passed on to their progeny. The bulls have had a grain free preparation. Grazing on forage sorghum over summer and then forage oats. They are match fit and ready to work.

We are committed to **breeding cattle that will maximise your profits**. This is evident in our approach to data-driven breeding practices. Each bull has undergone DNA testing and yearling scanning to ensure that we offer genetics of the highest commercial relevance. By combining scientific analysis with genomic testing, we aim to provide you with bulls that meet your expectations in terms of quality and performance.

Our Shorthorn Bulls represent the largest offering in NSW from one vendor this year, and we are proud to highlight their exceptional marbling attributes. Similarly, our Charolais Bulls are noted for their impressive carcass qualities and ease of finishing, making them a valuable addition to any breeding program.

With increased interest for Futurity genetics going into Queensland we have taken the step to **vaccinate against Tick fever (Three Germ Blood) all sale and paddock bulls to be sold in 2024**.

All bulls have been DNA tested and Sire verified. The bulls with PP have been tested homozygous polled and will only breed polled calves, even when joined to a horned cow.

EPD's and EBV's with shading are in the Top 30% of their breed.

We understand the importance of making informed decisions when selecting genetics for your herd. That's why we encourage you to view the bulls prior to the sale. Join us for our **Beef Technology and Bull Walk Day on Thursday 8th August**, where you can personally inspect the bulls, discuss their performance data, and learn more about how they can contribute to your breeding goals.

Choosing the right genetics is crucial for the long-term success of any operation, and we are here to support you every step of the way. Feel free to reach out to us with any questions or to arrange a visit before the sale. We look forward to welcoming you, showcasing our bulls and enjoying our hospitality.

Regards

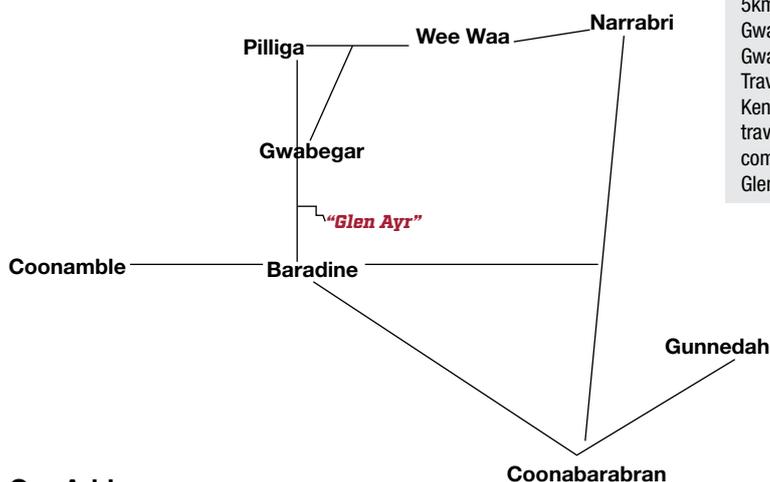

Jason, Kylie, Riley and Jess

SALE INFORMATION & CONDITIONS

- **Inspection** – We encourage prospective buyers to inspect the cattle prior to sale. This gives us the opportunity to assist in selection of the best genetics for your particular requirements. Inspection on Sale Day will be from 10 am.
 - **Supplementary Sheet** – Up to date weights, scrotal size and scanning data will be supplied.
 - **Breeding Guarantee** – Bulls have been semen tested and breeding soundness assessed prior to sale. In the unlikely event of infertility, the vendor guarantees that (without expenses, interest, cost and damages) if the bull proves to be totally infertile or totally incapable of natural service, provided it is not caused by an injury or disease contracted since leaving the sale, to either replace with an animal of comparable value or credit to the full purchase price will be given at the next sale or on a private sale animal. Any complaint must be lodged with a relevant Veterinary Certificate within 6 months of the date of Sale direct to the Vendor. Bulls that run in a multiple joined environment are not guaranteed for breakdown or injury.
 - **Health** – TB & Brucellosis free herd and stock are free to move anywhere in Australia. BJD Status is 6.
- All bulls have been tested negative to Bovine Pestivirus and vaccinated against Vibrio, Tick Fever and 5 in 1.**
- **Buyers Orders & Phone link up** – Buying orders will be diligently executed by a person nominated by you to act on your behalf. Bidding by phone will be available. Contact Jason or your preferred agent 48hrs prior to sale to make arrangements for phone numbers and time.
 - **Intending buyers please note** – Buyers numbers system will be in operation, therefore all prospective purchasers will be required to register prior to the commencement of the sale.
 - **Insurance** – Insurance representatives will be in attendance on Sale Day. We encourage you to insure all purchases.
 - **Personal transport** – We can arrange transport to and from “Glen Ayr”, please contact the selling Agent or Vendors. The closest major airport is Dubbo 2.25 hrs. Air strip available on request at Baradine for private planes.
 - **Accommodation** –
[Reggies Tattersalls Hotel](#)
 Baradine - 0467 900 153
[Thirsty Farmer](#)
 Baradine - 02 6843 1649
 - Refreshments for morning tea and a light lunch will be supplied prior to the Sale.
 - **Please Note** –
 - It is unethical for anyone to promote, advertise or arrange the sale of any cattle, other than those in the sale, on the sale premises.
 - The Vendors will not be responsible for any errors or omissions in this catalogue.
 - GST will be added on the fall of the hammer to purchase price.
 - All cattle will have their NLIS buttons and will be transferred to successful purchaser's number by selling agent at completion of sale.

LOCATION MAP

Our Address:
1466 Wangmans Rd Kenebri NSW

FROM NARRABRI

Go to Wee Waa then towards Pilliga. Go past the Cuttabri Wine Chanti about 5km and take the turn left towards Gwabegar. At the crossroads in Gwabegar turn left towards Baradine. Travel approx. 18km and just before Kenebri turn left onto Wangmans Rd, travel 2km down this road and as you come out of the dog leg in the road Glen Ayr is on the Right.

FROM COONABARABRAN

Travel to Baradine until you get to a T section. Turn Left towards Coonamble and before the railway line turn Right towards Pilliga. Travel 20km as you are coming out of Kenebri take Wangmans Rd, the dirt road to your right, travel 2km down this road and as you come out of the dog leg in the road Glen Ayr is on the Right.

FROM COONAMBLE

Travel to Baradine until you get to the railway line. Turn Left after the line towards Pilliga. Travel 20km as you are coming out of Kenebri take Wangmans Rd, the dirt road to your right, travel 2km down this road and as you come out of the dog leg in the road Glen Ayr is on the Right.

IMPORTANT NOTICES

The selling Agent, its members, subsidiary or related corporations, officers, agent and employees for themselves and for those for whom they act, while exercising due care provide all information without responsibility and give no guarantee whatsoever as to its accuracy. All persons who attend the sale do so entirely at their own risk and the Selling Agent, its members, subsidiary or related corporation, officers, agents, employees and its principals for themselves and for those for whom they act, do not assume or accept any responsibility or liability of whatever nature for an injury or damage whatsoever which may occur.

Average EPD's for 2022 born calves as of July 2024

	CE	BW	WW	YW	Milk	MCE	MWWT	STAY	DOC	CW	REA	FAT	MARB	YG	API
EPD	8.3	2.4	52.1	77.9	21.9	5.8	47.8	12.6	10.2	-2.9	0.34	-0.083	-0.06	-0.36	108.89

UNDERSTANDING THE IGS EPD SUITE

MATERNAL EPDS

CALVING EASE DIRECT (CE-D)

Reported as the percentage of extra unassisted births in first calving heifers, relative to the average. CE-D is relative to the direct Calving Ease of the animal. Higher values are more favourable.

CALVING EASE MATERNAL (CE-M)

Reported as the percentage of extra unassisted births in first calving heifers, relative to the average. CE-M is relative to the Calving Ease of the daughters of the animal. Higher values are more favourable.

MILK

Reported as pounds of weaning weight of progeny from the animals daughters, relative to the average. Predicts the difference in maternal production of daughters relative to milk production and mothering. Values are relative to the environment of the production system. Low input environments should be very conscious of introducing too much milk due to the increased nutrient requirements that it can place on cows.

MATERNAL WEANING WEIGHT

Reported as pounds of weaning weight of progeny from the animals daughters, relative to the average. This is a measure of weaning weight differences relative to the combined effects of growth and milk. Breeders who are not looking to change milk production should consider Total Maternal as the most relevant EPD for maternal weaning weights. Higher values are more favourable.

STAYABILITY (STAY)

Reported as the differences in percentage of a sire's offspring that are predicted to still be in the herd at 6 years of age . . . given that they calved at 2, relative to the average. Stayability is a measure of reproductive longevity. Higher values are more favourable.

DOCILITY

Reported as the percentage of progeny, relative to the average, that will record a score of docile. Higher values are more favourable.

GROWTH EPDS

BIRTH WEIGHT

Reported in pounds of birth weight relative to the average. When selecting bulls to use on heifers, breeders should also focus on the Calving Ease EPD as Birthweight is already used in the Calving Ease EPD calculation.

WEANING WEIGHT – ADJUSTED TO 205 DAYS

Reported in pounds of weaning weight of direct progeny, relative to the average. Higher values are usually more favourable dependant on its relationship with birthweight.

YEARLING WEIGHT – ADJUSTED TO 365 DAYS

Reported in pounds of yearling weight of direct progeny, relative to the average. Higher values are usually more favourable dependant on its relationship with birthweight.

CARCASE EPD'S – ADJUSTED TO 475 DAYS OF AGE

CARCASE WEIGHT

Reported as pounds of Carcase Weight relative to the average. Higher values are usually more favourable, however this is relevant to each producers target market.

RIB EYE AREA

Reported as square inches relative to the average. Higher values are usually more favourable.

FAT

Reported as inches of back fat relative to the average. Higher values are usually more favourable, however this requires a balance between adequate doing ability in daughters and carcass fat thresholds for target markets.

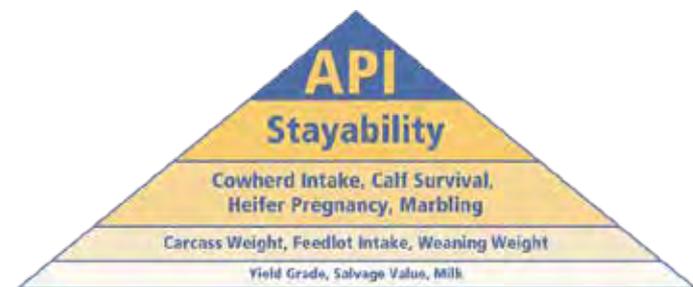

YIELD GRADE

Reported as expected differences in progeny average USDA Yield Grade scores. Yield Grade is used to improve the yield potential of progeny and may see a strange value for Australian animals. Whilst Australian animals will never receive a USDA graded Yield Grade score, they will also never receive an actual Retail Beef Yield % value either. However, US Shorthorns (including progeny of Australian sires used in the US) are USDA graded each year and so the pedigree linkages provide linkage to actual USDA Yield Grade values. Lower values are usually more favourable, however because of the negative correlations between fat and yield it is important to maintain some balance in the selection.

MARBLE SCORE

Reported as the differences in actual carcass marble scores relative to the average. This is different to IMF% which is used as an indicator trait in Marble Score. Higher values are more favourable.

ALL PURPOSE INDEX – API

Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ Indexes come in. Through well conceived, rigorous mathematical computation, \$ Indexes blend EPD's and economics to estimate an animal's overall impact on your bottom line.

The All Purpose \$Index (API) evaluates sires for use on the entire cow herd, bred to both first-calf heifers and mature cows, with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put onto feed and marketed for both quality grade and yield.

UNDERSTANDING ACCURACIES

BOLT EPD accuracies have experienced the most change, usually lowering numerically and especially for non-parent animals, however the reported accuracy will be more accurate.

Accuracy refers to the amount a reported EPD can possibly change as more data is added. EPD values with higher accuracy result in less possible change for the value over time. More accurate accuracies better represent the amount of possible change for each EPD.

REFERENCE SIRES

FUTURITY QUADRANT Q256

Colour: Red Ident. No.: JJJQ256

Sire: FUTURITY MAGIC MIKE M302 (P)

Dam: FUTURITY HECTORS MARY ANN N165 (P)

Quadrant was our top selling sire in 2021 selling to Butterleaf Shorthorns for \$37000. We used Quadrant to improve structure, capacity, maternal function and carcass quality.

After his progeny Proof Quintessential could be one of the most influential carcass sires the Charolais breed has seen. This sire's progeny are very placid super thick, medium maturity and very easy doing. Not often do you see the level of carcass merit combined with growth and fertility. **Quintessential is a trait leader for 200 day growth, Top 1% Eye muscle area, Fat and IMF, Top 10% Growth, Top 20% Scrotal size.**

Quad has done an excellent job for us. He is producing placid cattle with good finishing ability, plenty of thickness and sound structures. We are confident this sire will leave us with excellent females moving forward or add fertility and finishing ability for crossbreeding operations retaining females.

Quad is a Trait leader for Scrotal size, Top 10% Fat and Northern Maternal index, Top 20% 600 day growth.

Our Commitment To Making The Cattle Better

THE HERD

Large contemporary groups managed under standard commercial conditions

Artificial Insemination (AI) programs of over 80% of all age females to increase genetic gain by individually choosing the best joining for each female

Calves are Birth Weighed and Calving Ease recorded on the day of birth

GENETIC EVALUATION

Growth rates and ultrasound scanning of all bulls and heifers as yearlings to identify cattle that marble at an early age. DNA samples are collected for Genomic evaluation.

Carcase data is obtained and fed back into the genetic evaluation system

Calves are temperament scored at weaning

PROGENY & PARTNERSHIP

Partnering with Commercial producers in a Progeny Test program to follow the male and female progeny collecting information on female production and the steers performance in the feed yard and carcass. The information is fed back to be genetically evaluated to identify quality carcass genetics

NOTES: Very placid, easy fleshing and doing young sire that stands on great structure. We used Thunderstruck as a yearling last spring on first calf cows for his ideal phenotype backed by an excellent data set. This young sire will produce easy finishing cattle of low birth weight, with good growth excellent carcass quality. Note: he is a carrier of BPA (Progressive Ataxia), a recessive condition which shouldn't be of concern to cross breeders. Not recommended in purebred herds.

Top 10% Scrotal size and Fat, Top 25% Birth weight and eye muscle area.

SALE NOTES

*Thank you for attending our 2024 Bull Sale.
 We wish you all a safe trip home!*

Futurity Network Advantage

Client Services

- **Marketing Assistance**

Assistance promoting and marketing of your livestock is a service we offer to those using Futurity genetics. Market Alert emails are sent throughout our network with the details of your livestock to producers, agents, and livestock buyers. Your cattle will gain greater exposure and potential premiums.

- **Livestock Classification**

“Free classing of females” - working with producers to assist in the development of a breeding plan to maximise potential to meet target markets and goals. Contact us to discuss your breeding program, livestock classification or to select genetics that will be most profitable for your operation. This collaborative approach also enables insight as to how the genetics are performing.

- **Progeny Test Program**

Partnering with Commercial producers in a Progeny Test program to follow the male and female progeny, collecting information on female production and the steers. The information is fed back to be genetically evaluated to identify quality carcass genetics.

- **Beef Technology Days**

Beef Technology days are part of a service we offer to all breeders of beef. Industry relevant key note speakers share information and updates with producers. These days are also beneficial for networking and for the “Cow Nerds” to talk bull all day!

- **Newsletter**

Scan here to receive our newsletters and keep up to date with the happenings at Futurity. Also be the first to know of market alert sales listings.
