Autumn Calving
Female Dispersal

Friday 7th March 2025, 2pm

- 10 Yearling Heifers
- 44 PTIC Cows
- 1 Semen Package

FUTURITY FEMALE HERITAGE

When Futurity was established 37 years ago, our goal was to develop a cow herd that showcased the finest qualities of the Shorthorn breed. We focused on acquiring donor females and embryos of the highest calibre, carefully selecting the best genetics to build a foundation. Over the years, as exceptional female lines emerged, we continued to add to our herd, growing and refining our cow families. While some lines have thrived, others have naturally faded, but each has contributed to the success of the program.

Below is a list of the cow families represented in the sale, along with their origins.

Enia. Female line from the famous Mandalong stud developed by Rick Pisaturo. Progeny started in this female line were derived from Mandalong Enia M9, Mandalong Enia D1, Sprys Prophets Enia 2nd. This line has always breed cattle with growth, carcass yield and plenty of milk.

Ruby. Female line from the Marrington stud at Dubbo. This female line started with just one female produced from an embryo who was a sister to the high selling Sprys Instant Powerhouse 9th and from Marrington Ruby who was also the mother of Marrington JP who sold for \$50000 in 1999. This line consistently breeds cattle with plenty of constitution, placid natures and longevity.

Mary Anne. Female line from Alice Downs/Kaluga studs. Original female Kaluga Mary Anne 2nd who was bred by Sandy Munro. This line has bred quality females who have produced some top bulls. The line is a standout for their capacity, doing ability and marbling.

Carnation. Female line developed by the Spry Family and traces back to Darweena/Sprys studs. First female was Sprys Brags Carnation. The line is well known for their femininity, milking ability and excellent structure.

Muriel. Female line developed by Marellan stud. Our original female Manaroo Muriel 2nd goes back to Marellan Muriel 6th who was a two-time Sydney champion back in the day. The line has produced very feminine, fertile good milking females.

Dale. Produced by The Grove stud Condamine QLD. Original females were from embryos purchased from The Grove. The line is renowned for growth, yield and mobility.

Melita. Female line developed by Keith Edyvean at the Evilo stud at Wagga. Original Female was a donor Evilo Melita 9th. The line has plenty of milk, growth and excellent structure.

Lily. Female line from the USA brought in by Sprys with the original female being a full sister to DCC Prophet. Our original female was Spry Powerhouse Lilly N47. The line produced cattle with plenty of carcass shape and milk.

Gertrude. Line developed David Holmes Pakaraka stud New Zealand. Our original female was Pakaraka Gertrude Z97 who I showed her grand dam for David back in my youth. Female line with heaps of capacity and doing ability.

Approval. Bred by the Hurst family Lake Hawdon SA. First female Lake Hawdon Approval R15 was our pick from their dispersal. The line produces tremendous carcass shape, high milk and placid cattle.

Wendy. Last but not least, a line developed by Futurity, bred from a Futurity blood herd purchased with our Coonamble property Reaburn from Wendy and Wall Brown. We selected the best of the cows and upgraded them through the SFA system. The line has been bred for superior doing ability, fertility and carcass quality.

FUTURITY PASTORAL

The Brand of Consistent Quality

Friday 7th March 2025

SALE INFORMATION & CONDITIONS

- **Inspection** – We encourage prospective buyers to inspect the cattle prior to sale. This gives us the opportunity to assist in selection of the best genetics for your particular requirements. Inspection on Sale Day will be from 11 am.
- **Supplementary Sheet** – Available to download prior to the sale or on the day.
- **Breeding Guarantee** – Cows are sold PTIC and as proven breeders. Heifers have been vet checked for reproductive soundness.
- **Health** – TB & Brucellosis free herd and stock are free to move anywhere in Australia. BJD Status is 6.
- **Buyers Orders & Phone link up** – Buying orders will be diligently executed by a person nominated by you to act on your behalf. Bidding by phone will be available. Contact Jason or your preferred agent 48hrs prior to sale to make arrangements for phone numbers and time.
- **Intending buyers please note** – Buyers numbers system will be in operation, therefore all prospective purchasers will be required to register prior to the commencement of the sale.
- **Insurance** – Insurance representatives will be in attendance on Sale Day. We encourage you to insure all purchases.
- **Personal transport** – We can arrange transport to and from

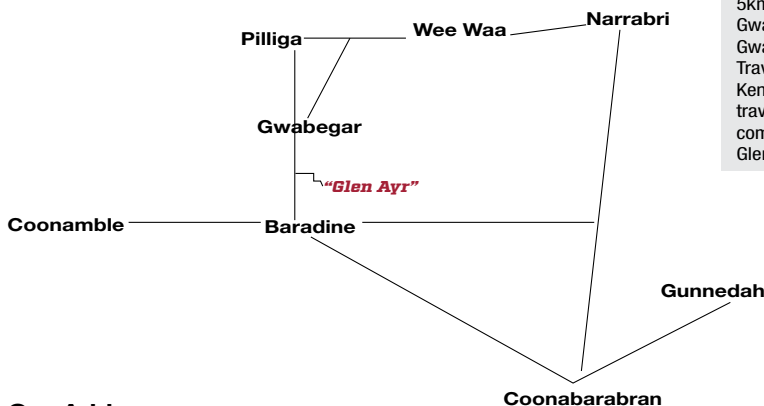

“Glen Ayr”, please contact the selling Agent or Vendors. The closest major airport is Dubbo 2.25 hrs. Air strip available on request at Baradine for private planes.

- **Accommodation** –
Reggies Tattersalls Hotel
Baradine - 0467 900 153
Thirsty Farmer
Baradine - 02 6843 1649
- Refreshments for morning tea and a light lunch will be supplied prior to the Sale.
- **Please Note** –
 - It is unethical for anyone to promote, advertise or arrange the sale of any cattle, other than those in the sale, on the sale premises.
 - The Vendors will not be responsible for any errors or omissions in this catalogue.
 - GST will be added on the fall of the hammer to purchase price.
 - All cattle will have their NLIS buttons and will be transferred to successful purchaser's number by selling agent at completion of sale.

IMPORTANT NOTICES

The selling Agent, its members, subsidiary or related corporations, officers, agent and employees for themselves and for those for whom they act, while exercising due care provide all information without responsibility and give no guarantee whatsoever as to its accuracy. All persons who attend the sale do so entirely at their own risk and the Selling Agent, its members, subsidiary or related corporation, officers, agents, employees and its principals for themselves and for those for whom they act, do not assume or accept any responsibility or liability of whatever nature for an injury or damage whatsoever which may occur.

LOCATION MAP

Our Address:
1466 Wangmans Rd Kenebri NSW

FROM NARRABRI

Go to Wee Waa then towards Pilliga. Go past the Cuttabri Wine Chanti about 5km and take the turn left towards Gwabegar. At the crossroads in Gwabegar turn left towards Baradine. Travel approx. 18km and just before Kenebri turn left onto Wangmans Rd, travel 2km down this road and as you come out of the dog leg in the road Glen Ayr is on the Right.

FROM COONABARABRAN

Travel to Baradine until you get to a T section. Turn Left towards Coonamble and before the railway line turn Right towards Pilliga. Travel 20km as you are coming out of Kenebri take Wangmans Rd, the dirt road to your right, travel 2km down this road and as you come out of the dog leg in the road Glen Ayr is on the Right.

FROM COONAMBLE

Travel to Baradine until you get to the railway line. Turn Left after the line towards Pilliga. Travel 20km as you are coming out of Kenebri take Wangmans Rd, the dirt road to your right, travel 2km down this road and as you come out of the dog leg in the road Glen Ayr is on the Right.

For Local Agribusiness Service, We've Got All Your Needs Covered

Welcome to the Ladies of Autumn Female Sale!

We are pleased to invite you to explore our special offering and appreciate your interest and support in this event.

After careful consideration and review of our workload during busy times of the year, we have made the difficult decision to disperse the entire Autumn calving group. This decision has not been made lightly, as many of these outstanding females have consistently delivered the type of quality and profitable progeny we aim for at Futurity.

The sale begins with 10 stylish, eye-catching yearling heifers, with an impressive average **API in the Top 15%**. Sired by Trojon Romper Stomper R30 whose data aligns with our goal of producing maternally efficient cattle with high marbling, quality carcass and stayability.

In addition, we are offering 44 proven PTIC cows. These females boast outstanding pedigrees and data sets and have proven their worth by consistently producing high-quality replacement females and sale bulls. Sire lines include Futurity Next Level N326, the sire of Futurity Rapid Gain, who sold for a record-breaking \$85,000, and Futurity Edged In Stone K148, who has left a lasting stamp of quality throughout the herd. Yamburgan Anzac, purchased for \$42,000 was worth the investment and has left a nice line of females.

Some of the cows in this group were transferred from Spring to Autumn calving last year due to a bull becoming infertile during the joining season. Rather than culling these exceptional females we decided to integrate them into the Autumn group.

The final lot in the sale is a genetic package in Daytona, who is undoubtedly the **highest API proven Shorthorn sire in Australia, and the second-highest for marbling**. His daughters are fertile, easy-doing, and excellent mothers, while his sons have commanded impressive prices, topping at \$40,000 and averaging \$18,300 over our last two sales. Sadly, we lost Daytona last year and now have limited semen stock. This will be the final opportunity to acquire Daytona semen.

We look forward to welcoming you to this event, showcasing our Ladies of Autumn, and sharing our hospitality.

Sincerely,

Jason, Kylie, Riley, Jess and the
Futurity Team

We purchased Romper Stomper in 2022 for \$30000, he was selected for his capacity, easy going nature and very profitably data set. The bull has not let us down and has done a top job of breeding true to type. His progeny are light and thrifty at birth, have good doing and finishing ability and are high marbling.

Romper is both joining sire and sire of the yearling heifers and we think his progeny speak for themselves.

We are very happy with Melbourne T103 since his purchase in March last year. He has completed two joining's and has held his condition and still grown out well.

We purchased Melbourne T103 for \$24000 at Naracoorte and he was selected for his finishing ability, growth, milk, moderate calving and high marbling.

Melbourne is a joining sire and the resulting progeny will be his first born.

NOTES: What a sire Daytona has turned out to be he is easily the highest API proven Shorthorn sire in Australia and second highest proven Shorthorn sire for Marbling. We have never used a bull that is so consistent at reducing birth weight, improving marbling and doing ability regardless of what you join him to. Daytona's daughters are very fertile, easy doing and are proving to be top mothers, his sons have topped at \$40000 and averaged \$18300 over our last two sales. **Sadly, we lost Daytona last year and now have limited semen stock. This will be the last ever Daytona semen to be released.**

A package of 5 Straws - 55A with option of another 5 straws 55B.

Top1% Calving ease, Birth weight, Marbling and API.

5 Straws each in A & B, successful bidder will have the option to take both packages.

LOT A: Purchaser: \$

LOT B: Purchaser: \$

Notes:

*Thank you for attending our Ladies of Autumn Female Sale.
 We wish you all a safe trip home!*

UNDERSTANDING THE IGS EPD SUITE

MATERNAL EPDS

CALVING EASE DIRECT (CE-D)

Reported as the percentage of extra unassisted births in first calving heifers, relative to the average. CE-D is relative to the direct Calving Ease of the animal. Higher values are more favourable.

CALVING EASE MATERNAL (CE-M)

Reported as the percentage of extra unassisted births in first calving heifers, relative to the average. CE-M is relative to the Calving Ease of the daughters of the animal. Higher values are more favourable.

MILK

Reported as pounds of weaning weight of progeny from the animals daughters, relative to the average. Predicts the difference in maternal production of daughters relative to milk production and mothering. Values are relative to the environment of the production system. Low input environments should be very conscious of introducing too much milk due to the increased nutrient requirements that it can place on cows.

MATERNAL WEANING WEIGHT

Reported as pounds of weaning weight of progeny from the animals daughters, relative to the average. This is a measure of weaning weight differences relative to the combined effects of growth and milk. Breeders who are not looking to change milk production should consider Total Maternal as the most relevant EPD for maternal weaning weights. Higher values are more favourable.

STAYABILITY (STAY)

Reported as the differences in percentage of a sire's offspring that are predicted to still be in the herd at 6 years of age . . . given that they calved at 2, relative to the average. Stayability is a measure of reproductive longevity. Higher values are more favourable.

DOCILITY

Reported as the percentage of progeny, relative to the average, that will record a score of docile. Higher values are more favourable.

GROWTH EPDS

BIRTH WEIGHT

Reported in pounds of birth weight relative to the average. When selecting bulls to use on heifers, breeders should also focus on the Calving Ease EPD as Birthweight is already used in the Calving Ease EPD calculation.

WEANING WEIGHT – ADJUSTED TO 205 DAYS

Reported in pounds of weaning weight of direct progeny, relative to the average. Higher values are usually more favourable dependant on its relationship with birthweight.

YEARLING WEIGHT – ADJUSTED TO 365 DAYS

Reported in pounds of yearling weight of direct progeny, relative to the average. Higher values are usually more favourable dependant on its relationship with birthweight.

CARCASE EPD'S – ADJUSTED TO 475 DAYS OF AGE

CARCASE WEIGHT

Reported as pounds of Carcase Weight relative to the average. Higher values are usually more favourable, however this is relevant to each producers target market.

RIB EYE AREA

Reported as square inches relative to the average. Higher values are usually more favourable.

FAT

Reported as inches of back fat relative to the average. Higher values are usually more favourable, however this requires a balance between adequate doing ability in daughters and carcass fat thresholds for target markets.

YIELD GRADE

Reported as expected differences in progeny average USDA Yield Grade scores. Yield Grade is used to improve the yield potential of progeny and may see a strange value for Australian animals. Whilst Australian animals will never receive a USDA graded Yield Grade score, they will also never receive an actual Retail Beef Yield % value either. However, US Shorthorns (including progeny of Australian sires used in the US) are USDA graded each year and so the pedigree linkages provide linkage to actual USDA Yield Grade values. Lower values are usually more favourable, however because of the negative correlations between fat and yield it is important to maintain some balance in the selection.

MARBLE SCORE

Reported as the differences in actual carcass marble scores relative to the average. This is different to IMF% which is used as an indicator trait in Marble Score. Higher values are more favourable.

ALL PURPOSE INDEX – API

Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ Indexes come in. Through well conceived, rigorous mathematical computation, \$ Indexes blend EPD's and economics to estimate an animal's overall impact on your bottom line.

The All Purpose \$Index (API) evaluates sires for use on the entire cow herd, bred to both first-calf heifers and mature cows, with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put onto feed and marketed for both quality grade and yield.

UNDERSTANDING ACCURACIES

BOLT EPD accuracies have experienced the most change, usually lowering numerically and especially for non-parent animals, however the reported accuracy will be more accurate.

Accuracy refers to the amount a reported EPD can possibly change as more data is added. EPD values with higher accuracy result in less possible change for the value over time. More accurate accuracies better represent the amount of possible change for each EPD.

Futurity Network Advantage

Client Services

- **Marketing Assistance**

Assistance promoting and marketing of your commercial livestock is a service we offer to those using Futurity genetics. Market Alert emails are sent throughout our network with the details of your livestock to producers, agents, and livestock buyers. Your cattle will gain greater exposure and potential premiums.

- **Livestock Classification**

“Free classing of females” - working with producers to assist in the development of a breeding plan to maximise potential to meet target markets and goals. Contact us to discuss your breeding program, livestock classification or to select genetics that will be most profitable for your operation. This collaborative approach also enables insight as to how the genetics are performing.

- **Progeny Test Program**

Partnering with Commercial producers in a Progeny Test program to follow the male and female progeny, collecting information on female production and the steers. The information is fed back to be genetically evaluated to identify quality carcass genetics.

- **Beef Technology Days**

Beef Technology days are part of a service we offer to all breeders of beef. Industry relevant key note speakers share information and updates with producers. These days are also beneficial for networking and for the “Cow Nerds” to talk bull all day!

- **Newsletter**

[Scan here](#) to receive our newsletters and keep up to date with the happenings at Futurity. Also be the first to know of market alert sales listings.

**Annual
Bull Sale**

**Thursday
28th August
2025**

**70 Shorthorn Bulls
40 Charolais Bulls**
