ANNUAL BULL SALE

110 Bulls

Shorthorn | Charolais

Thursday 27th August 2026, 1 pm

QUICK GUIDE - Using Breeding values to drive Profitability and Genetic gain in a beef production system

Longterm gains require direction (goal setting), commitment and consistency. It's easy to fall into the trap of trying to fix deficits in one generation.

Quick Guide

- Select 3 of the most important traits for your herd to improve
- % Ranking - Compares the Shorthorn Beef population - 1% being the highest
- API Index - extra \$\$\$ profitability of his progeny when joined to the entire cow herd, with his daughters retained and his steers fed for both carcase quality and carcase yield.
- Example is if Bull A has an API index figure of 125 and Bull B has and API of 50 the difference is \$75. If both bulls joined to 40 cows a year for 4 years the difference in profitability would be \$12,000

40 Cows X 4 years X \$75 = \$12,000

5 FUTURITY VENTURE V657

Born: 24/07/2024

Colour: Red

Ident. No.: JJJV657

FUTURITY EDGED IN STONE K148 (P)

MATERNAL

Maximising fertility & weaning rates increases kg/Ha
Efficient females that last longer in herd & produce more beef for less

GROWTH

Optimise Growth, not maximise.
Too much too late can create production issues.
Selecting for fast early growth to maximise turnoff, market compliance and female efficiency.

CARCASE

The only new money in the beef industry comes from consumers.
Increasing marble scores increases eating quality and increases demand.

To gain a greater understanding of each trait refer to page in our catalogue -

Outside Agent Rebate

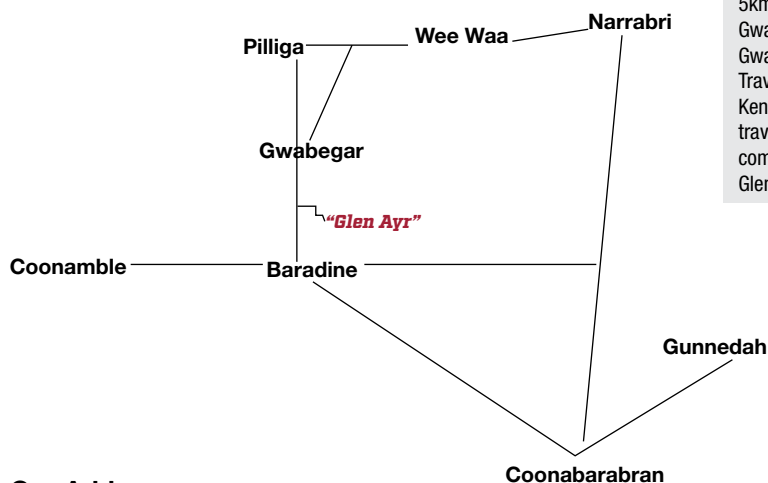

The Vendors agree to allow a rebate to outside Agents introducing their client in writing 24 hrs prior to the sale and settling on their behalf within 7 days of the sale.

SALE INFORMATION & CONDITIONS

- **Inspection** – We encourage prospective buyers to inspect the cattle prior to sale. This gives us the opportunity to assist in selection of the best genetics for your particular requirements. Inspection on Sale Day will be from 10 am.
- **Supplementary Sheet** – Up to date weights, scrotal size and scanning data will be supplied.
- **Breeding Guarantee** – Bulls have been semen tested and breeding soundness assessed prior to sale. In the unlikely event of infertility, the vendor guarantees that (without expenses, interest, cost and damages) if the bull proves to be totally infertile or totally incapable of natural service, provided it is not caused by an injury or disease contracted since leaving the sale, to either replace with an animal of comparable value or credit to the full purchase price will be given at the next sale or on a private sale animal. Any complaint must be lodged with a relevant Veterinary Certificate within 6 months of the date of Sale direct to the Vendor. Bulls that run in a multiple joined environment are not guaranteed for breakdown or injury.
- **Health** – TB & Brucellosis free herd and stock are free to move anywhere in Australia. BJD Status is 6.
All bulls have been tested negative to Bovine Pestivirus and vaccinated against Vibrio and 5 in 1, Pesti Guard and 3 Germ - Tick Fever.
- **Buyers Orders & Phone link up** – Buying orders will be diligently executed by a person nominated by you to act on your behalf. Bidding by phone will be available. Contact Jason or your preferred agent 48hrs prior to sale to make arrangements for phone numbers and time.

- **Intending buyers please note** – Buyers numbers system will be in operation, therefore all prospective purchasers will be required to register prior to the commencement of the sale.
- **Insurance** – Insurance representatives will be in attendance on Sale Day. We encourage you to insure all purchases. Ownership passes at the fall of the hammer.
- **Personal transport** – We can arrange transport to and from “Glen Ayr”, please contact the selling Agent or Vendors. The closest major airport is Dubbo 2.25 hrs. Air strip available on request at Baradine for private planes.
- **Accommodation** – Accommodation options available in Coonabarabran and Narrabri.
- Refreshments for morning tea and a light lunch will be supplied prior to the Sale.
- **Please Note** –
 - It is unethical for anyone to promote, advertise or arrange the sale of any cattle, other than those in the sale, on the sale premises.
 - The Vendors will not be responsible for any errors or omissions in this catalogue.
 - GST will be added on the fall of the hammer to purchase price.
 - All cattle will have their NLIS buttons and will be transferred to successful purchaser's number by selling agent at completion of sale.

LOCATION MAP

Our Address:
1466 Wangmans Rd Kenebri NSW

FROM NARRABRI

Go to Wee Waa then towards Pilliga. Go past the Cuttabri Wine Chanti about 5km and take the turn left towards Gwabegar. At the crossroads in Gwabegar turn left towards Baradine. Travel approx. 18km and just before Kenebri turn left onto Wangmans Rd, travel 2km down this road and as you come out of the dog leg in the road Glen Ayr is on the Right.

FROM COONABARABRAN

Travel to Baradine until you get to a T section. Turn Left towards Coonamble and before the railway line turn Right towards Pilliga. Travel 20km as you are coming out of Kenebri take Wangmans Rd, the dirt road to your right, travel 2km down this road and as you come out of the dog leg in the road Glen Ayr is on the Right.

FROM COONAMBLE

Travel to Baradine until you get to the railway line. Turn Left after the line towards Pilliga. Travel 20km as you are coming out of Kenebri take Wangmans Rd, the dirt road to your right, travel 2km down this road and as you come out of the dog leg in the road Glen Ayr is on the Right.

IMPORTANT NOTICES

The selling Agent, its members, subsidiary or related corporations, officers, agent and employees for themselves and for those for whom they act, while exercising due care provide all information without responsibility and give no guarantee whatsoever as to its accuracy. All persons who attend the sale do so entirely at their own risk and the Selling Agent, its members, subsidiary or related corporation, officers, agents, employees and its principals for themselves and for those for whom they act, do not assume or accept any responsibility or liability of whatever nature for an injury or damage whatsoever which may occur.

Welcome to our 18th Annual On Property Sale

Dear Beef Producers,

Welcome to our 2026 On-Property Bull Sale. We're excited to extend this invitation to view our offering and sincerely thank you for your ongoing interest and support.

This year we're proud to present a draft of 110 bulls — 65 Shorthorn and 45 Charolais. Each bull has been selected with a balanced approach, focused on delivering the performance and profit-driving traits that will carry through to their progeny. Our breeding goals continue to prioritise the characteristics that best serve commercial and seedstock producers alike.

Our Shorthorn offering is the largest single-vendor draft in Australia this year, showcasing the breed's superior marbling, calving ease and maternal function. Our Charolais bulls continue to impress with their calm dispositions, carcass yield and ease of finishing — an ideal fit across a range of breeding programs.

About the Bulls

This Shorthorn draft includes our largest ever offering of Daytona sons. If you're after improved calving ease in heifers, along with better marbling and finishing ability, these easy doing Daytona sons are well worth a look.

Futurity Scotch Fillet has done it again, producing another top line of short-coated, easy doing young sires that bend the curve from birth weight to growth. Scotch Fillet sons are already performing strongly across northern and central Queensland.

Two newer sires making a real impact in this draft are Futurity Solid and Futurity Trademark. Both are producing sons with great constitution and capacity, backed by well-balanced breeding values that lift growth without sacrificing calving ease.

Our Charolais draft is one we're especially proud of — the disposition, constitution and finishing ability of these young sires raise the bar on carcass shape and yield. Nearly all are polled, with a strong line-up of red-factor sires adding notable softness to the offering.

We know choosing the right genetics is critical to the long-term success of your operation, which is why we encourage you to inspect the bulls before sale day. Join us for our **Bull Walk Day on Tuesday, 11th August**, where you can view the draft, discuss performance data, and see how our genetics align with your program goals.

We're here to help in any way we can — please don't hesitate to reach out with questions or to arrange a visit ahead of the sale. We look forward to welcoming you, showcasing our 2026 lineup, and sharing our hospitality.

Warm regards,

Jason, Kylie, Riley and Jess

Bull Walk Day

Tuesday 11th August, 11am - 3 pm

Morning tea and Lunch available - RSVP by 10th - 0427979249

REFERENCE SIRES

FUTURITY SCOTCH FILLET S373

Colour: RLW Ident. No.: JJJS373

Sire: JSF TIMES SQUARE 120G ET (P)

Dam: FUTURITY MASTERS WENDY Q128 (P)

Scotch Fillet has become an impacted sire for the shorthorn breed, his progeny bend the curve for birth weight and growth are short coated very easy doing and do well in northern conditions. Sons have sold to \$56000 and his daughters have become invaluable females in the herd for there efficiency.

BAYVIEW DAYTONA Q34

Colour: Roan Ident. No.: HT Q34

Sire: BAYVIEW ARCHER M15 (P)

Dam: BAYVIEW MISS BEAUTY M10 (P)

Daytona has turned out to be a super sire, who has taken calving ease and marbling to the next level for the breed. **Daytona is the highest API proven shorthorn sire in the SB data base and in the top few sires for birth weight, calving ease and marbling.** His progeny speak for themselves. His daughters are easy keeping and have great udders. His sons have sold to \$57000 and are breeding the house down in both stud and commercial settings.

REFERENCE SIRES

WEEBOLLABOLLA SEVERN S55

Colour: Roan Ident. No.: AGFS55

Sire: WEEBOLLABOLLA QUIDONG Q4 (P)

Dam: WEEBOLLABOLLA BUSHEL N77 (P)

We purchased Severn for his growth, maternal and carcass attributes in 2023 for \$47000.

Severn has not disappointed. His progeny has added length and weight, super calm dispositions and excellent carcass characteristics.

IGS EPD's as of 20/07/26

UNDERSTANDING THE IGS EPD SUITE

MATERNAL EPDS

CALVING EASE DIRECT (CE-D)

Reported as the percentage of extra unassisted births in first calving heifers, relative to the average. CE-D is relative to the direct Calving Ease of the animal. Higher values are more favourable.

CALVING EASE MATERNAL (CE-M)

Reported as the percentage of extra unassisted births in first calving heifers, relative to the average. CE-M is relative to the Calving Ease of the daughters of the animal. Higher values are more favourable.

MILK

Reported as pounds of weaning weight of progeny from the animals daughters, relative to the average. Predicts the difference in maternal production of daughters relative to milk production and mothering. Values are relative to the environment of the production system. Low input environments should be very conscious of introducing too much milk due to the increased nutrient requirements that it can place on cows.

MATERNAL WEANING WEIGHT

Reported as pounds of weaning weight of progeny from the animals daughters, relative to the average. This is a measure of weaning weight differences relative to the combined effects of growth and milk. Breeders who are not looking to change milk production should consider Total Maternal as the most relevant EPD for maternal weaning weights. Higher values are more favourable.

STAYABILITY (STAY)

Reported as the differences in percentage of a sire's offspring that are predicted to still be in the herd at 6 years of age . . . given that they calved at 2, relative to the average. Stayability is a measure of reproductive longevity. Higher values are more favourable.

DOCILITY

Reported as the percentage of progeny, relative to the average, that will record a score of docile. Higher values are more favourable.

GROWTH EPDS

BIRTH WEIGHT

Reported in pounds of birth weight relative to the average. When selecting bulls to use on heifers, breeders should also focus on the Calving Ease EPD as Birthweight is already used in the Calving Ease EPD calculation.

WEANING WEIGHT – ADJUSTED TO 205 DAYS

Reported in pounds of weaning weight of direct progeny, relative to the average. Higher values are usually more favourable dependant on its relationship with birthweight.

YEARLING WEIGHT – ADJUSTED TO 365 DAYS

Reported in pounds of yearling weight of direct progeny, relative to the average. Higher values are usually more favourable dependant on its relationship with birthweight.

CARCASE EPD'S – ADJUSTED TO 475 DAYS OF AGE

CARCASE WEIGHT

Reported as pounds of Carcase Weight relative to the average. Higher values are usually more favourable, however this is relevant to each producers target market.

RIB EYE AREA

Reported as square inches relative to the average. Higher values are usually more favourable.

FAT

Reported as inches of back fat relative to the average. Higher values are usually more favourable, however this requires a balance between adequate doing ability in daughters and carcase fat thresholds for target markets.

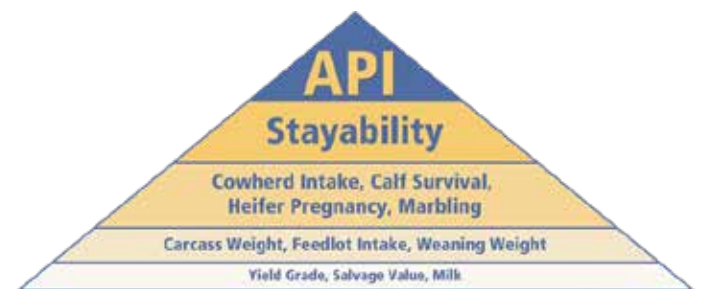

YIELD GRADE

Reported as expected differences in progeny average USDA Yield Grade scores. Yield Grade is used to improve the yield potential of progeny and may seem a strange value for Australian animals. Whilst Australian animals will never receive a USDA graded Yield Grade score, they will also never receive an actual Retail Beef Yield % value either. However, US Shorthorns (including progeny of Australian sires used in the US) are USDA graded each year and so the pedigree linkages provide linkage to actual USDA Yield Grade values. Lower values are usually more favourable, however because of the negative correlations between fat and yield it is important to maintain some balance in the selection.

MARBLE SCORE

Reported as the differences in actual carcase marble scores relative to the average. This is different to IMF% which is used as an indicator trait in Marble Score. Higher values are more favourable.

ALL PURPOSE INDEX – API

Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ Indexes come in. Through well conceived, rigorous mathematical computation, \$ Indexes blend EPD's and economics to estimate an animal's overall impact on your bottom line.

The All Purpose \$Index (API) evaluates sires for use on the entire cow herd, bred to both first-calf heifers and mature cows, with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put onto feed and marketed for both quality grade and yield.

UNDERSTANDING ACCURACIES

BOLT EPD accuracies have experienced the most change, usually lowering numerically and especially for non-parent animals, however the reported accuracy will be more accurate.

Accuracy refers to the amount a reported EPD can possibly change as more data is added. EPD values with higher accuracy result in less possible change for the value over time. More accurate accuracies better represent the amount of possible change for each EPD.

Are you leaving profit on the table?

Every breeding decision can impact your bottom line.

With profit driven genetics you can:

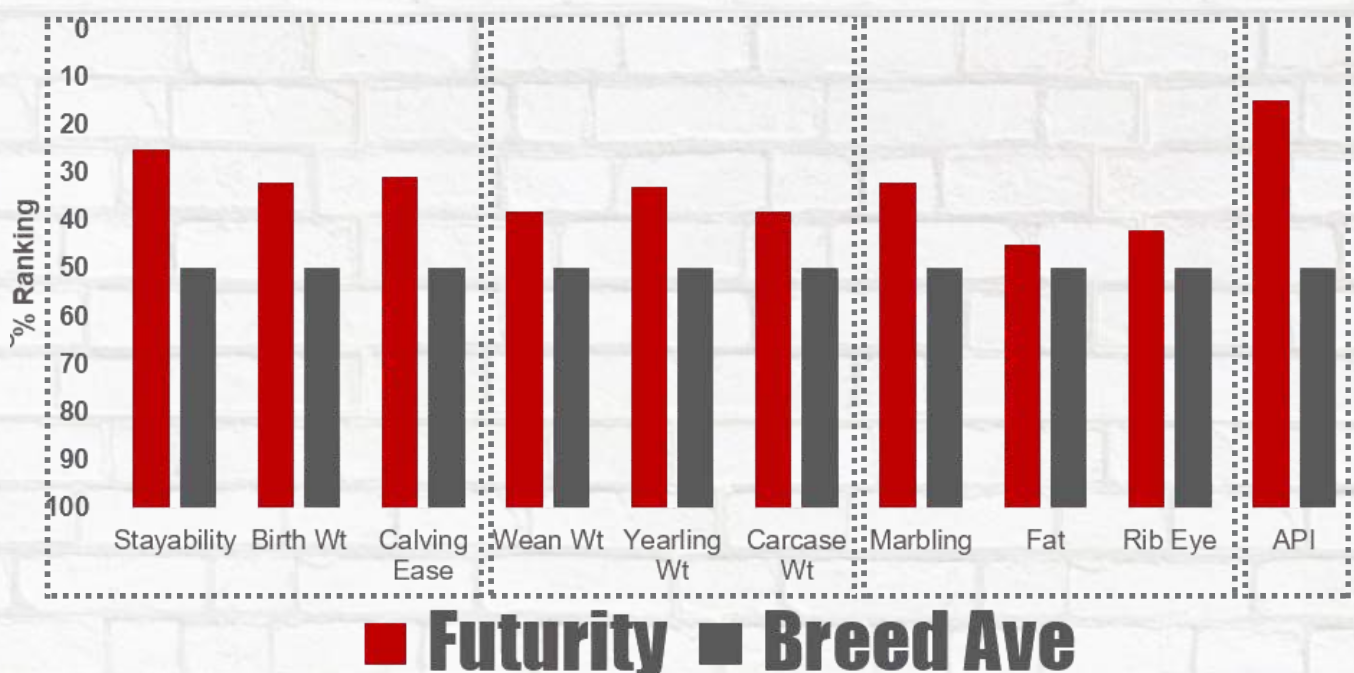

- ✓ Improve herd fertility, growth and feed efficiency.
- ✓ Enhance carcase traits to meet market demand
- ✓ Make smarter selections backed by performance data
- ✓ Build long term profitability into your breeding plan

It's not just about genetics – it's about making genetics work for your business.

Why choose Futurity?

- Cattle that look like they will perform, backed by performance data that proves they will.
- Decades of performance recording, breeding for commercial profitability.
- Performance-focused selection for fertility, maternal attributes, structure, and carcass traits.
- Futurity bulls are bred to perform in real-world commercial operations and deliver long term value across generations.

2026 Shorthorn Sale Bulls compared to Breed Average % Rank

1 FUTURITY VERMONT V693

YACCAMOO COWBOY (P) PIKC15E (P)
TEMANA K38E TJK38E (D)
TEMANA C45E TJC45E (D)

NOTES: What can I say? This young sire has it all: perfect structure, depth of body, thickness, very placid nature, and great skin and hair type. This young sire had a high selling brother in last year's sale. Winchester has an outstanding data set that offers profitability across a wide range of traits and excels on a carcass end point.

Productivity + Efficiency = Profitability

That's the power of the right genetics working in a commercial herd.

This is what commercial efficiency looks like at Stoney Creek Beef, Walcha.

A moderate, easy-doing cow with minimal input requirements, consistently producing a thumping big weaner. More kilograms weaned with less feed, less labour and fewer headaches.

The most profitable cow isn't always the biggest, it's the one that quietly gets the job done, year after year.

*Thank you for attending our 2026 Bull Sale.
We wish you all a safe trip home!*

SALE NOTES

Stress Less Bull Delivery - Freight Rebate

Let us take the stress and expense out of your bull deliveries. Deliveries can be arranged to the purchasers property at \$100 per bull up to 400km or NSW borders on major routes and to Roma QLD. This will only apply if freight is arranged by Jason.

While every care will be taken, no responsibility can be accepted for injuries whilst awaiting delivery. Bull insurance coverage is recommended.

Futurity Network Advantage

Client Services

- **Marketing Assistance**

Assistance promoting and marketing of your commercial livestock is a service we offer to those using Futurity genetics. Market Alert emails are sent throughout our network with the details of your livestock to producers, agents, and livestock buyers. Your cattle will gain greater exposure and potential premiums.

- **Livestock Classification**

“Free classing of females” - working with producers to assist in the development of a breeding plan to maximise potential to meet target markets and goals. Contact us to discuss your breeding program, livestock classification or to select genetics that will be most profitable for your operation. This collaborative approach also enables insight as to how the genetics are performing.

- **Progeny Test Program**

Partnering with Commercial producers in a Progeny Test program to follow the male and female progeny, collecting information on female production and the steers. The information is fed back to be genetically evaluated to identify quality carcass genetics.

- **Beef Technology Days**

Beef Technology days are part of a service we offer to all breeders of beef. Industry relevant key note speakers share information and updates with producers. These days are also beneficial for networking and for the “Cow Nerds” to talk bull all day!

- **Newsletter**

[Scan here](#) to receive our newsletters and keep up to date with the happenings at Futurity. Also be the first to know of market alert sales listings.
